ASSISTANT PROFESSOR

DEPARTMENT OF INFORMATION TECHNOLOGY

Objective:

To enhance user experience and functionality, the Aakam360 website implements a dark/light theme toggle and ensures full compatibility across all devices, providing a seamless interface on mobiles, tablets, and desktops. The platform is expanded with new pages including Career, Services, Blog, Why Choose Aakam360, and a Get a Quote form to offer comprehensive information and interaction points. A chatbot is integrated to deliver real-time assistance, helping users navigate the site and find answers instantly. Additionally, email integration enables smooth communication by handling user inquiries and form submissions effectively.

Project Description:

The Aakam360 website is a user-friendly platform with key features like toggleable dark/light themes, a chatbot for enhanced interactivity, and email integration for communication. It provides insights into the platform's objectives, mentors, partners, and events. Built using React.js for the frontend, it offers a modern, responsive interface. The website integrates MongoDB Atlas for backend data storage, enabling efficient management of programs and user data. New pages such as 'Mentors', 'Partners', and 'Events' have been added for better navigation. The platform is designed to be adaptable to all devices, ensuring a smooth user experience across various screen sizes. The chatbot enhances user engagement by providing instant support. Email functionality facilitates seamless communication and form submissions

Overall completion Status:

Project Component	Completion %
Frontend(React js)	80%
Backend(Node js+Express js)	75%
DATABASE(MongoDB)	90%
UI/UX Design	85%
Testing &Debugging	50%
Test Completion	75%

Project Completion Status:

Module Name	Completion %
Chatbot Integration	90%
PDF Upload & Viewer	80%
Blog/Updates Section	85%
Form Submission	90%
Admin Panel	90%

Outcome:

The Aakam360 website has been successfully developed with a user-friendly interface, dark/light theme options, and full integration of email and chatbot features. Users can easily navigate the site on various devices and interact with the platform more effectively. The website is ready for production deployment, with all objectives met to improve user engagement and functionality.
