Aakam360 has been a leading platform for providing Enabling students to acquire industry knowledge and bridge the gap between Industry and Institute.As part of our commitment to continuous improvement, we aim to enhance user engagement and experience by introducing two new features: a chatbot and feedback videos.A chatbot designed to provide instant support and feedback videos aimed at capturing detailed user insights. These additions will not only streamline user interactions but also provide valuable insights into user satisfaction and areas for further improvement.

- Aakam360 currently offers a wide array of functionalities, catering to diverse user needs.
- Despite its robust offerings, user feedback and engagement statistics highlight areas needing improvement.
- Users have expressed the need for more immediate support options and a more interactive way to provide feedback.
- The integration of a chatbot and feedback video feature addresses these concerns, promising a more dynamic and responsive user experience.

- **Enhancement:**

- Integrate a sophisticated chatbot for 24/7 support.
- Add feedback video capabilities to capture user insights.

- **User Experience:**

- Make navigation more intuitive and interactive.
- Gather detailed user feedback for continuous improvement.

- **Engagement:**

- Increase user retention and satisfaction.
- Provide a platform for users to voice their opinions visually.

- **24/7 Support:** Constant availability for user queries.
- **Quick Responses:** Immediate answers to common questions.
- **Seamless Navigation:** Guide users through the website efficiently.
- **Personalized Interactions:**
 - Understand user behavior
 - Enhance user satisfaction with customized support.

- **User Feedback**

- Capture visual and verbal feedback from users.
- More expressive and detailed feedback compared to text.

- **Engagement**

- Higher engagement through video submissions.
- Users feel more connected when they can see and hear responses.

- **Promotional Use:**

- Use positive feedback videos as testimonials.
- Enhance the credibility of the website.

- The integration of the chatbot will follow a structured workflow.
- Initially, we will define the chatbot's scope and capabilities, ensuring it can handle common queries effectively.
- Development will involve creating the chatbot using a suitable platform and training it with extensive data.
- Rigorous testing will be conducted to ensure accuracy and reliability.
- Finally, the chatbot will be deployed on the Aakam360 website and monitored continuously for performance and user feedback.

- Integrating the feedback video feature involves several critical steps.
- First, we will design a user-friendly interface for recording and submitting videos
- This interface will be seamlessly integrated into the existing user dashboard.
- Next, we will establish a secure storage solution for the video files and develop a system to analyze the feedback.
- After thorough testing, the feature will be launched, and users will be encouraged to start submitting their video feedback.

- The chatbot integration requires several high-level components.
- We need a robust natural language processing engine to understand user queries accurately.
- The chatbot must access and retrieve information from the Aakam360 database efficiently.
- Additionally, we need a seamless handover mechanism to transfer complex queries to human agents.
- Security and privacy measures are paramount to protect user data.
- An analytics dashboard will also be necessary to monitor the chatbot's performance and user interactions.

- Implementing the feedback video feature entails specific requirements.
- A user-friendly interface for recording and uploading videos is essential.
- We need a secure and scalable storage solution to handle potentially large volumes of video data.
- Advanced analytics tools are required to transcribe and analyze video content.
- Ensuring user privacy and data security is critical. Additionally, a system to categorize and prioritize feedback for actionable insights is necessary.

Thank you
